

**Amendments to the Specification:**

Please replace the paragraph beginning at line 10 of page 7 with the following rewritten paragraph:

-- Detailed Description of Preferred Embodiment

The present invention relates to a trailer and limited articulating hitch mechanisms, where the hitch mechanisms are pivotal in a vertical plane. This allows the trailer to readily follow the terrain, while limiting the tracking of the towed vehicle to the tracking alignment of the towing vehicle. The trailer and non limited articulating hitch mechanism will now be described with regard to the accompanying Figures, where like reference numerals represent like components or features throughout the several views. --
